Printing with Android devices

A prerequisite for printing with a mobile device at the UAS Grisons is that it is registered on the WLAN (e.g. "eduroam" or "public") of the FH Graubünden.

1. Download the "SAFEQ Cloud" app from the Playstore and install it.

2. Make the following configurations in the app:

In the "Settings" tab, enter the gateway "print.fhgr.ch:9444" and click on "Test Connection". If the text was successful, click on "Save".

SAFEQ Cloud				
MY JOBS	ACCOUNT	SETTINGS	HELP	
Using gateway:				
print.fhgr.ch:9444				
Api key (optional)				
Discover				
Test connection				
Save				

Enter the FH Graubünden account data in the "Account" tab and click "Login".

- 4. Messages such as "gethistoryprintjobsforusername" can be ignored.
- 5. The document now appears on the multifunctional devices (copiers) of the FH Graubünden.

The printout will be charged as usual according to the price list of the FH Graubünden.
