

Use Public WLAN

1. Connect to the “public” WLAN network.

Windows 8 / 10

Mac

2. Start an Internet browser (e.g. Safari, Firefox, etc.) and type in a various URL.
3. It is possible, that an advice appears about problems with the certificate. You can trust and allow the access to your browser.
4. As long as you're not logged in, your browser is redirected automatically to a site, where you have to log in with your username and password. Confirm your credentials with “Login”.

Anmeldung für das public WirelessLAN

| | |
|--|---|
| Benutzername | <input type="text"/> |
| Passwort | <input type="password"/> |
| | <input type="button" value="Anmelden"/> |
| Sie haben noch keine Zugangsdaten der FH Graubünden? | |
| | <input type="button" value="Registrieren"/> |

5. After the login, you have access to the Internet until you disconnect the WLAN (e.g. logout from system, shut down, etc.).
