

## VPN access University of Applied Sciences of the Grisons

1. Download and open "ps-pulse-win...64bitinstaller" from the Intranet.

The File is located under Downloads -> Informatik > Software > Pulsesecure > win.

2. Carry out the installation with the default settings.
3. When the installation is complete, the VPN profile must be added.

To do this, click on the "+" and set up the profile as follows:

Type: (Default)

Name: for example (FHGR)

Server-URL: <https://vpn.fhgr.ch>

4. In the taskbar a new symbol will appear:

with inactive VPN:

with active VPN:
