

Printing with Mac OS X 10.10 (Yosemite)

To print with the new operating system Yosemite (10.10) the following conditions have to be fulfill:

1. The latest driver has to be installed.
2. The Sandboxing has to be configured the right way.

The latest driver you can find under the following link:

http://support.rioh.com/bb/html/dr_ut_e/ra/model/mpc40/mpc40de.htm

The Sandboxing you can configure correctly like this:

1. Open the Terminal, enter in the search bar (loupe top right) „Terminal“.
2. Execute followed `Orders` sequentially:
3. `sudo bash`
4. Enter Admin Password of your Mac.
5. `echo "Sandboxing Relaxed" >> /etc/cups/cups-files.conf`
6. `launchctl stop org.cups.cupsd`
7. `exit`
